

### Factory breakage

#### Description

There has been a breakage on your factory. You have to pay 150 credits to restore the functionality of the factory, and restart the business function.

#### Effects

CurrentBudget : -150

### License expired

#### Description

Some licenses have expired. For this sprint only, you have to pay extra 20% of cost for any UI feature.

#### Effects

Any feature which is a child of feature 3.0 (UI) or even itself, will cost 20% more

### Environment protect

#### Description

Greenpeace thinks your factory is not environmentally friendly. You have to upgrade your equipment, which is costing 100 credits.

#### Effects

CurrentBudget : -100

### Dangerous virus

#### Description

A new virus becomes increasingly popular. Pay 140 credits to quickly develop the software that protects your users from the virus. However, if you have implemented the "Track New Viruses" feature, the cost goes down to paying 40 credits.

#### Effects

CurrentBudget : -140  
OR  
CurrentBudget: -40 (if "Track new Viruses" implemented)

### Labour strike

#### Description

There has been a labour strike. From now on either the labour will cost 60 credits, or you lose 15 days of effort in planning the following sprint (applies to one sprint only).

#### Effects

CurrentRevenue: -10  
OR  
Effort: -15 (current sprint )

### Lost lawsuit

#### Description

You have just lost a lawsuit. You have to pay the equivalent of 20% of your current revenue.

#### Effects

CurrentBudget :  
- CurrentRevenue/5

### New investor

#### Description

You have a new investor. Hurray! You are obliged to pay extra 20 credits every sprint from now on; but you receive 100 credits right now.

#### Effects

CurrentBudget : +100  
CurrentRevenue: -20

### Energy consumption

#### Description

Your software is battery inefficient. You have to implement the "Battery Life" feature this sprint; otherwise, you lose 8 reputation.

#### Effects

CurrentReputation : -8  
OR  
Implement 'Battery Life' this sprint
